

We are planning to operate in the winter of 2020/21. To mitigate the risk of Covid 19 infection for our guests and our staff, we will implement the following changes and updates to our procedures.

1. Instead of 11 guests, we will now only work with 8 guests maximum. That allows an occupancy of two guests to a room and generally reduces congestion in the lodge.
2. We will clean surfaces in the lodge more frequently, at least twice a day. We will also clean the outhouse once a day.
3. Hand washing is mandatory after each washroom use and before every meal. In addition, hand sanitizer is available on the upper floor as well as at the hand washing station and in the outhouse.
4. Guests will still make their lunches themselves and package them. Guests will wear masks while making lunches and each guest will use fresh implements. Hand washing is required before making lunches.
5. Guests will be asked to self-evaluate before entering the helicopter. Masks and gloves will be worn in the helicopter in accordance with the provider's rules. Guests who have an elevated temperature or show other possible Covid symptoms will not be allowed to join the trip.
6. Air filters are currently out of stock. If possible, an air filter with 0.1 micron capacity will be installed at the lodge.
7. Guests and staff who show potential Covid symptoms will be evacuated and asked to self isolate.
